

SAFETY RAIL CO.

THE SAFEST

IN PARTNERSHIP WITH SAFETY RAIL COMPANY

[SAFETYRAILCOMPANY.COM/SRCPARTNER](https://safetyrailcompany.com/srcpartner)
1-888-434-2720 - SALES@SAFETYRAILCOMPANY.COM

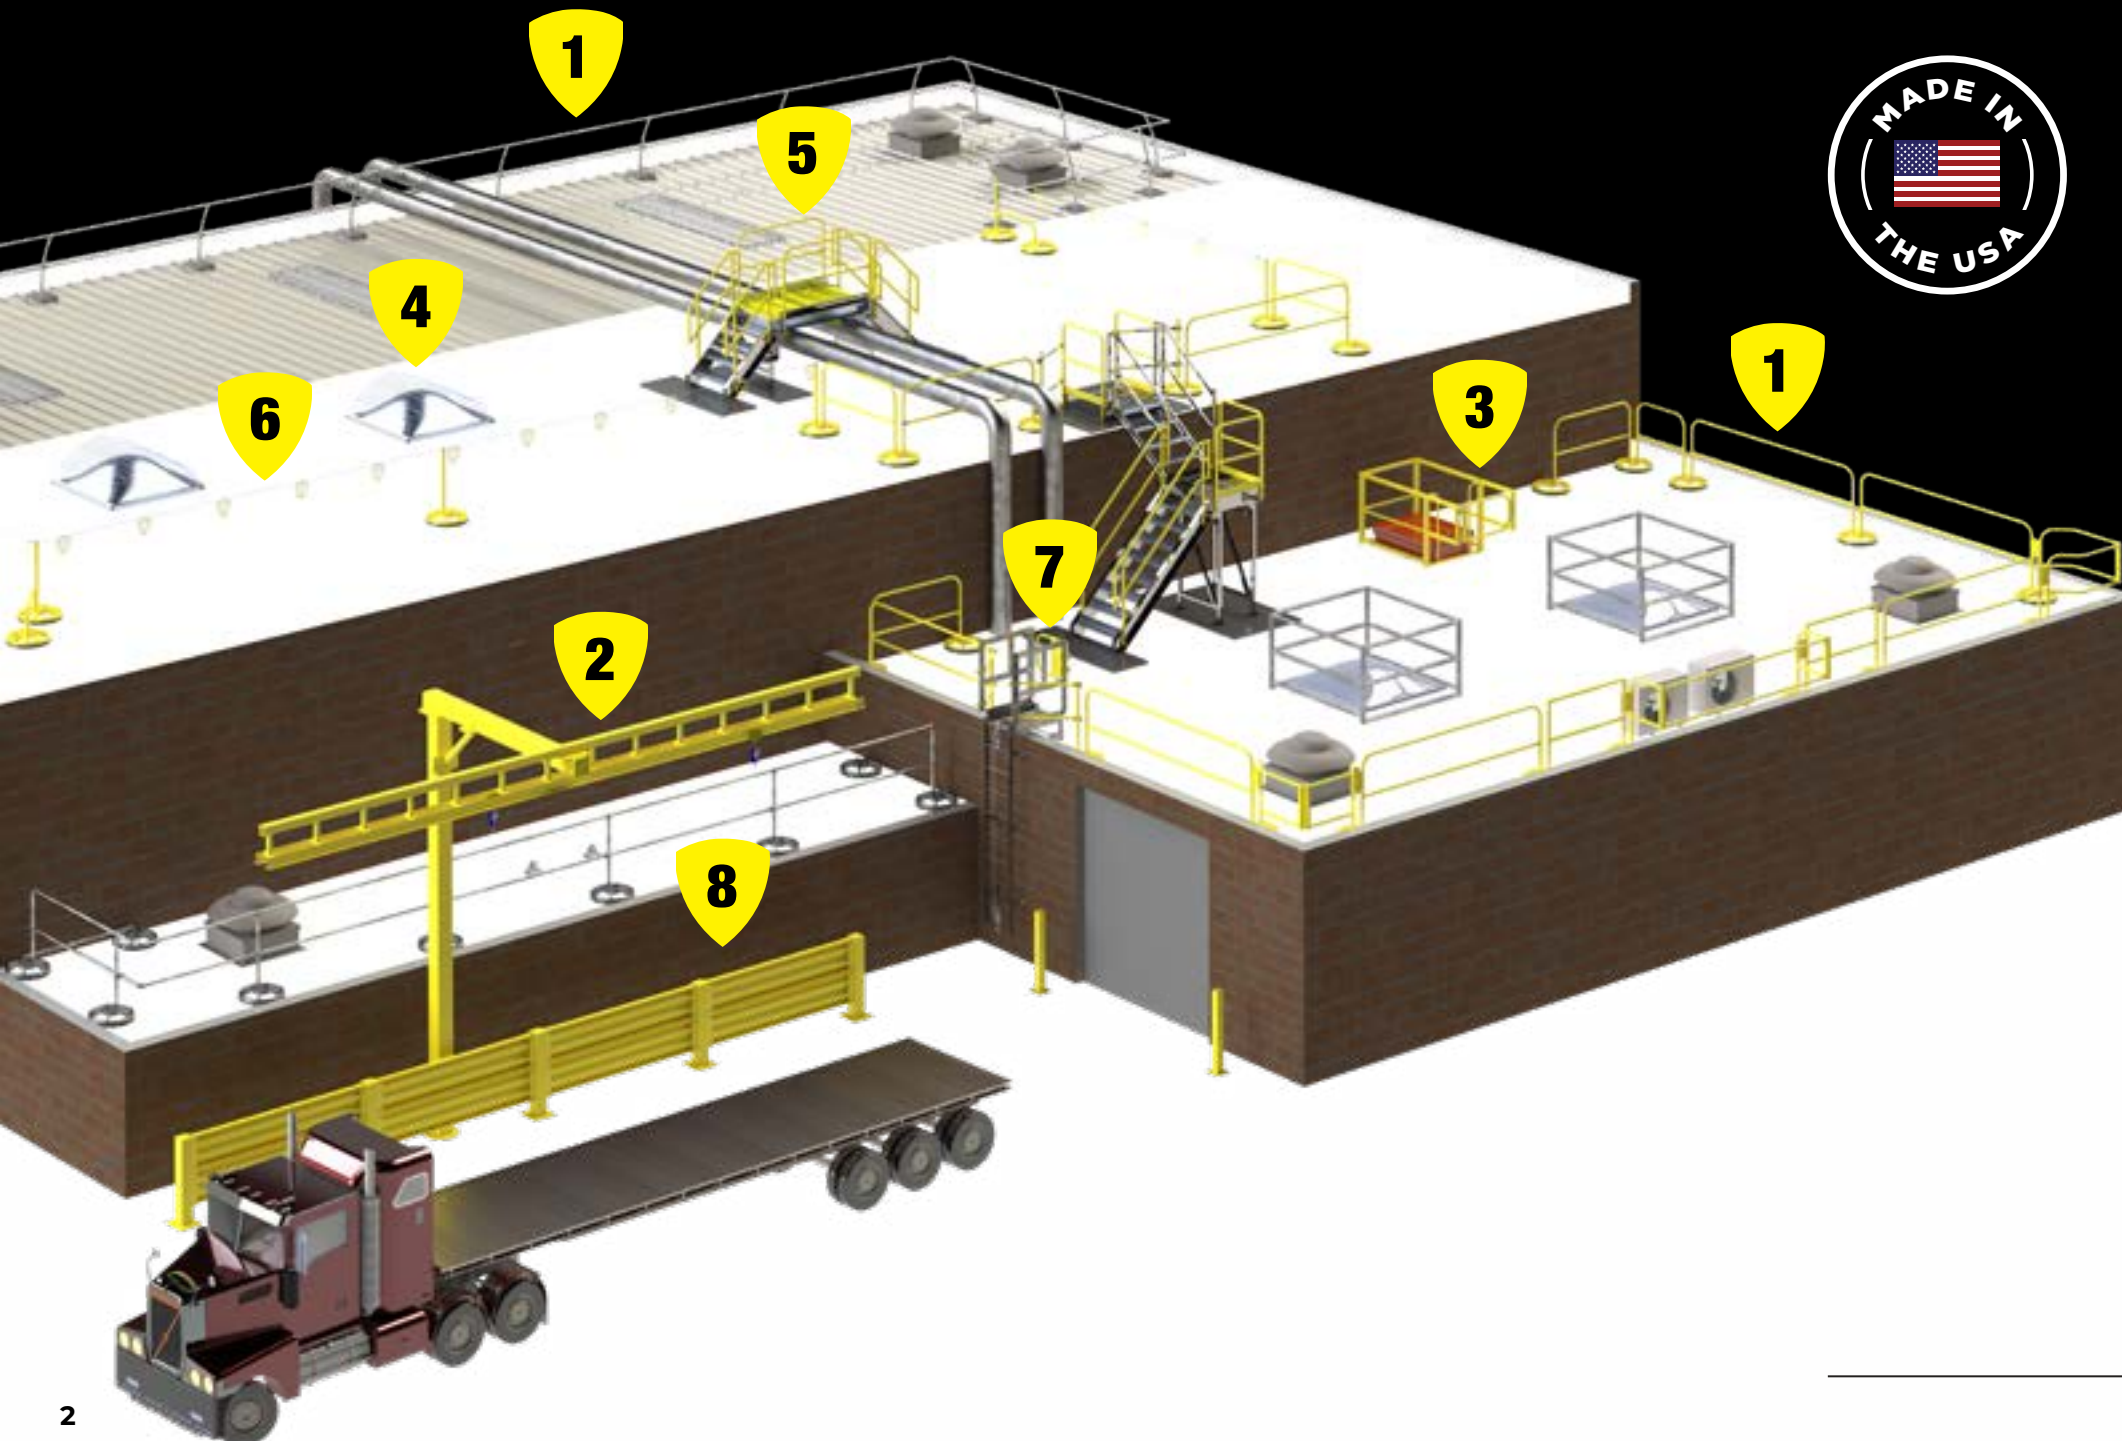

Risk is everywhere. Let's get to work.

LEAVE NOTHING TO RISK.

Non-compliant solutions, slow delivery and untrained installation labor may be less than obvious, but they can create frustration and unnecessary risk. Safety Rail is an end-to-end partner. From the initial site inspection, right up to the last bolts of an installation, we do the work. And once we're done, we're not done. Our continued inspection and maintenance services are also a part of the plan. **We're The Safest, and that's no accident.**

We source 100% domestic products in our manufacturing process, maintaining as many regional partnerships as possible. It gives us a line of sight to the quality of raw materials and helps us sustain our high standards. It also helps us reduce the risk of unforeseeable and extended supply chain disruption.

1 // GUARDRAILS

2 // OVERHEAD FALL PROTECTION

3 // HATCHGUARDS

4 // SKYLIGHT GUARDING

5 // CROSSOVER STAIRS

6 // VISUAL WARNING LINES

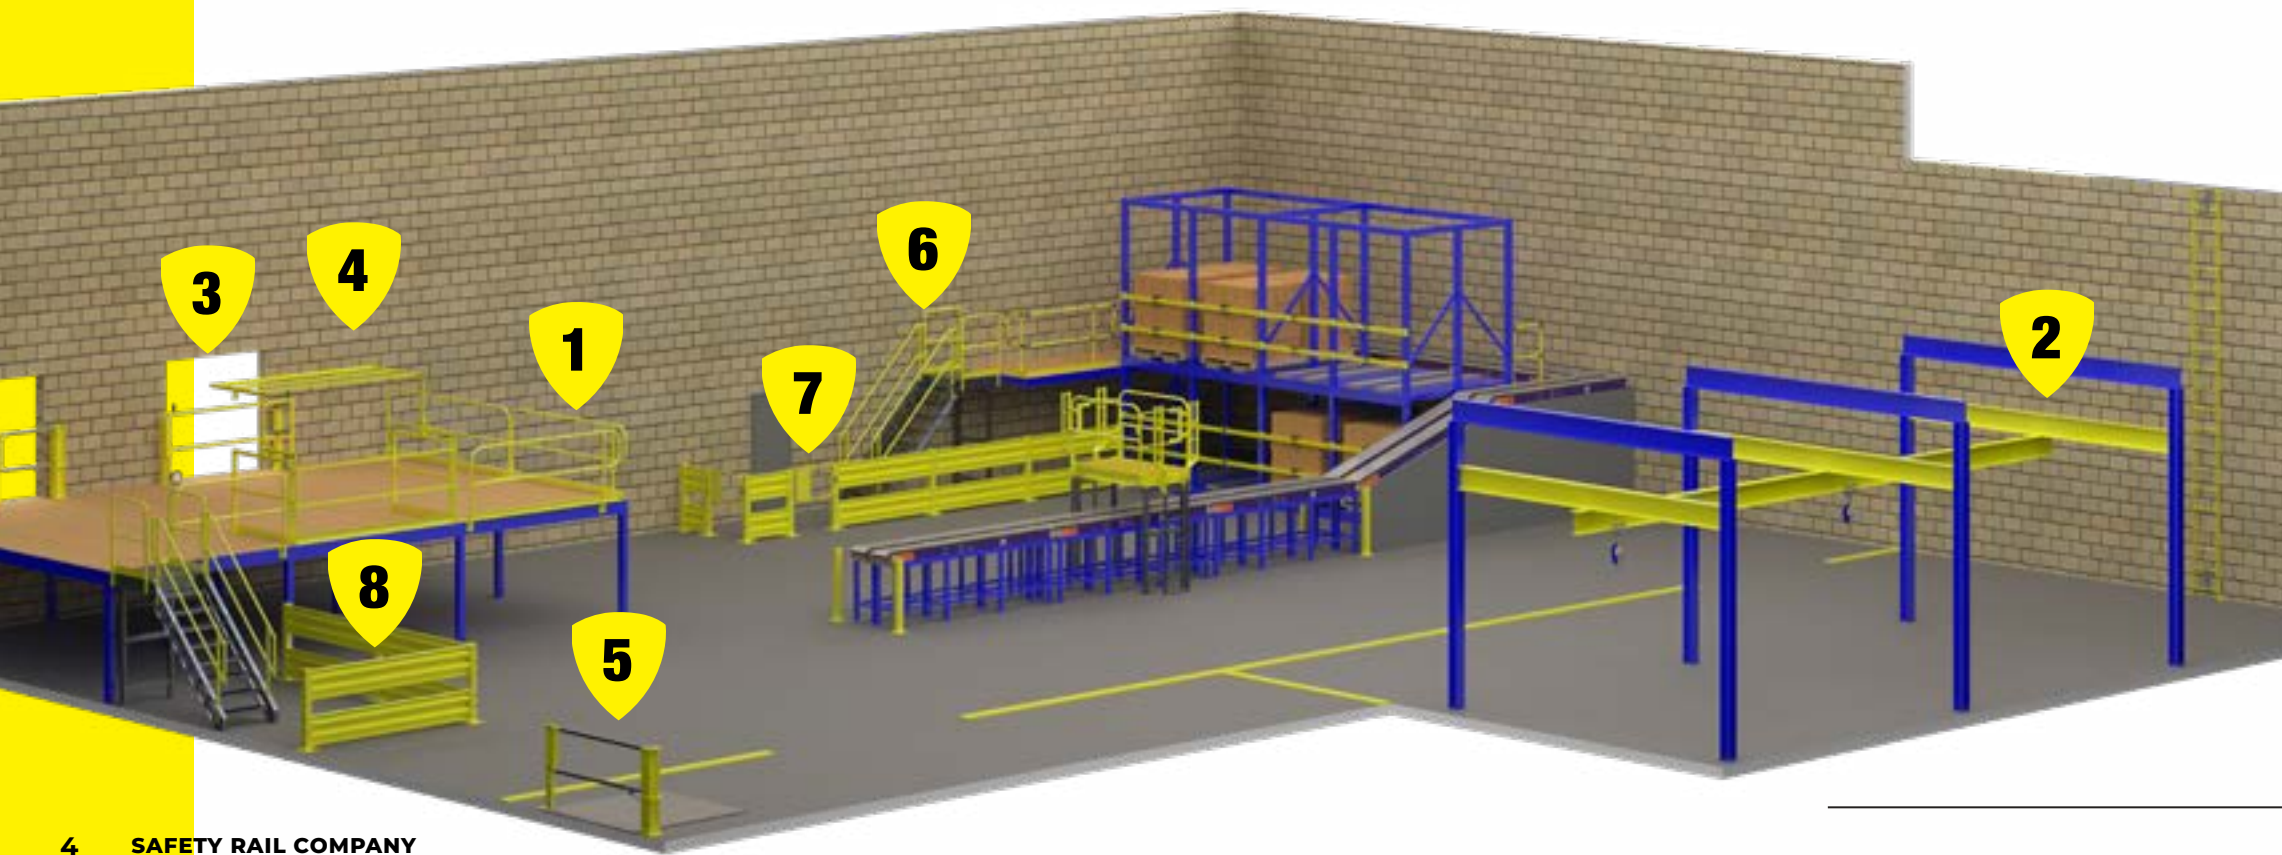

7 // SELF-CLOSING GATES

8 // FORKLIFT BARRIERS

We engineer, manufacture and install the industry's best fall protection systems.

Protection that extends well beyond the rooftop.

Discover all the ways Safety Rail Company helps keep personnel safe. SRC offers a comprehensive system of modular components engineered to address unique challenges and work together seamlessly to minimize exposure to risk... no matter how unlikely or how unusual.

“Just in time” usually isn’t.

The inventory and personnel to make things happen quickly.

At Safety Rail Company, we have impossibly high standards. We manufacture our own products right here in America—utilizing domestically sourced raw materials. Our hands-on approach is good for business... yours and ours. We never stop looking for ways to improve processes, find efficiencies, and meet the evolving needs and requirements of our customers.

This cornerstone principle allows us to maintain the highest of quality standards, manage supply chains and, most importantly, keep our commitments.

- ⊗ Domestically sourced raw materials
- ⊗ Industry-leading robotics and automation
- ⊗ Skilled U.S. workforce
- ⊗ AWS-certified welders
- ⊗ Our own fleet of trucks
- ⊗ SRC internal assessment and installation crews

You won't find a safety partner with a greater breadth of products, control over costs, or ability to deliver when promised.

1 // GUARDRAILS

2 // OVERHEAD FALL PROTECTION

3 // ROLLER GATES

4 // MEZZANINE GATES

5 // CANTILEVER GATES

Mobile Rail Systems

SRC360 MOBILE RAIL | ACCU-FIT MOBILE RAIL | HIDE-A-RAIL

- ⊗ Completely reconfigurable
- ⊗ Non-penetrating base
- ⊗ Permanent OSHA compliance
- ⊗ Standard finish options: powder coat safety yellow & galvanized

Safety Gates

CANTILEVER GATES | ROLLING GATES | MEZZANINE GATES | SELF-CLOSING GATES

- ⊗ Secure elevated workspaces
- ⊗ OSHA compliant protection
- ⊗ Standard finish options: powder coat safety yellow & galvanized
- ⊗ Universal mount Self-Closing Gate

Permanent Rail Systems

- ⊗ Mounted railing sections can be removed for access as needed
- ⊗ Prefabricated railing sections eliminate need for on-site assembly
- ⊗ Standard finish options: powder coat safety yellow & galvanized
- ⊗ Extended length railings allow mounting below walking surfaces

Hatchguards

- ⊗ Four-piece design, minimal assembly required
- ⊗ No drilling into hatch or roof
- ⊗ Self-closing gate included
- ⊗ 24" safe landing zone

Overhead Fall Protection

MULTI-COLUMN SYSTEM | DUAL-TRACK SYSTEM | SINGLE-COLUMN SYSTEM

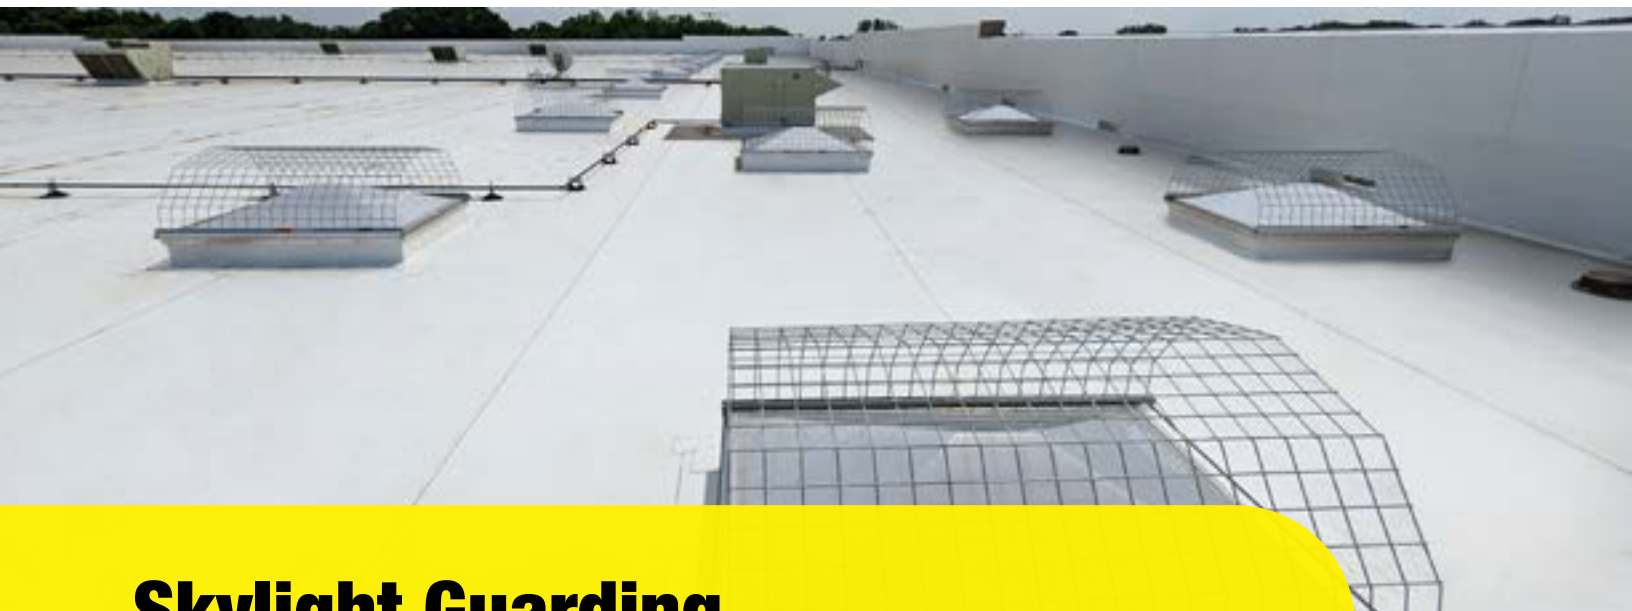

- ⊗ Allows multi-user bypass capabilities
- ⊗ Engineered for use in all weather environments
- ⊗ SRC professional installation or self-installation
- ⊗ Meets OSHA & ANSI requirements

Modular Stair Systems

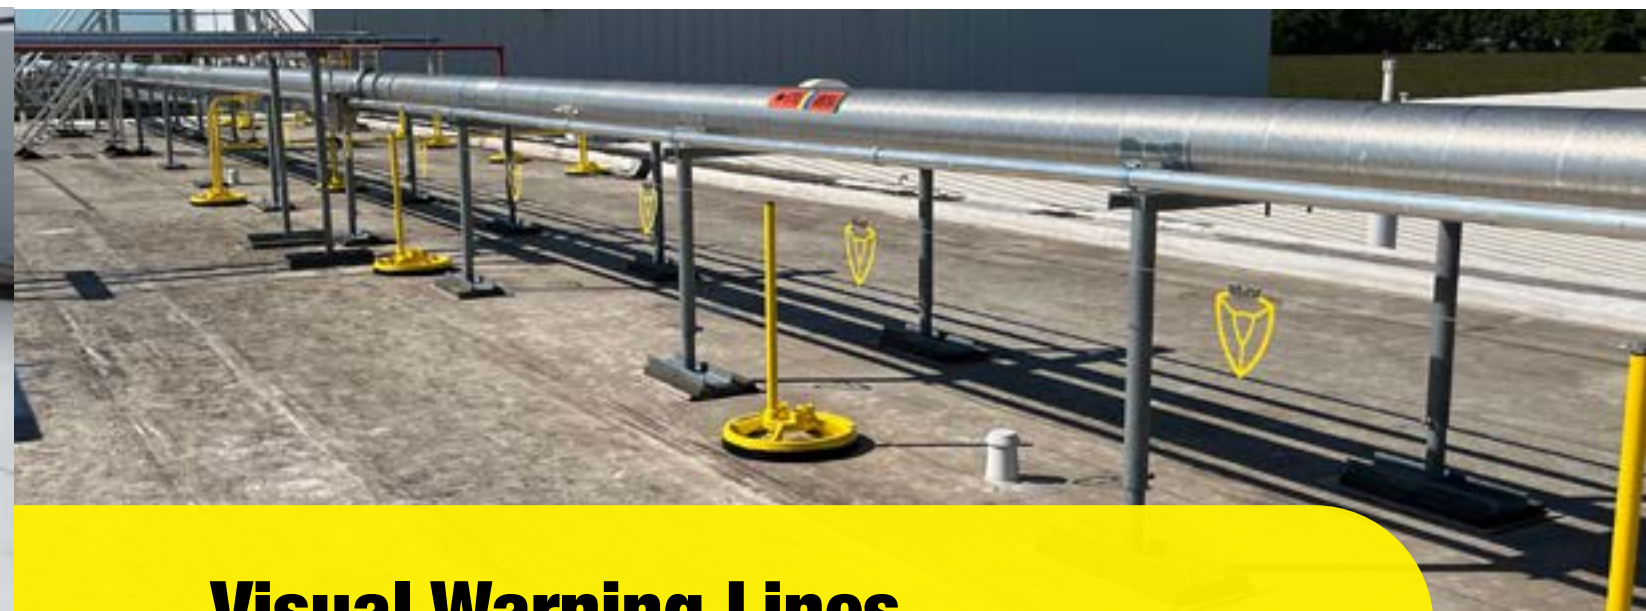

HEAVY DUTY STAIRS | CROSSOVERS | WORK PLATFORMS

- ⊗ Only 4 primary components: stairs, platforms, support legs and access ladders
- ⊗ Can be installed free-standing or mechanically attached to the substrate
- ⊗ CAD drawings with every system, so you know it will fit before we ship
- ⊗ Meets OSHA & ANSI requirements

Skylight Guarding

- ⊗ Sizes available up to 90" wide and 120" long
- ⊗ Heavy-duty protection prevents contact with skylight lens in the event of a fall
- ⊗ Non-penetrating design will not compromise building envelope
- ⊗ No welding or drilling required for installation

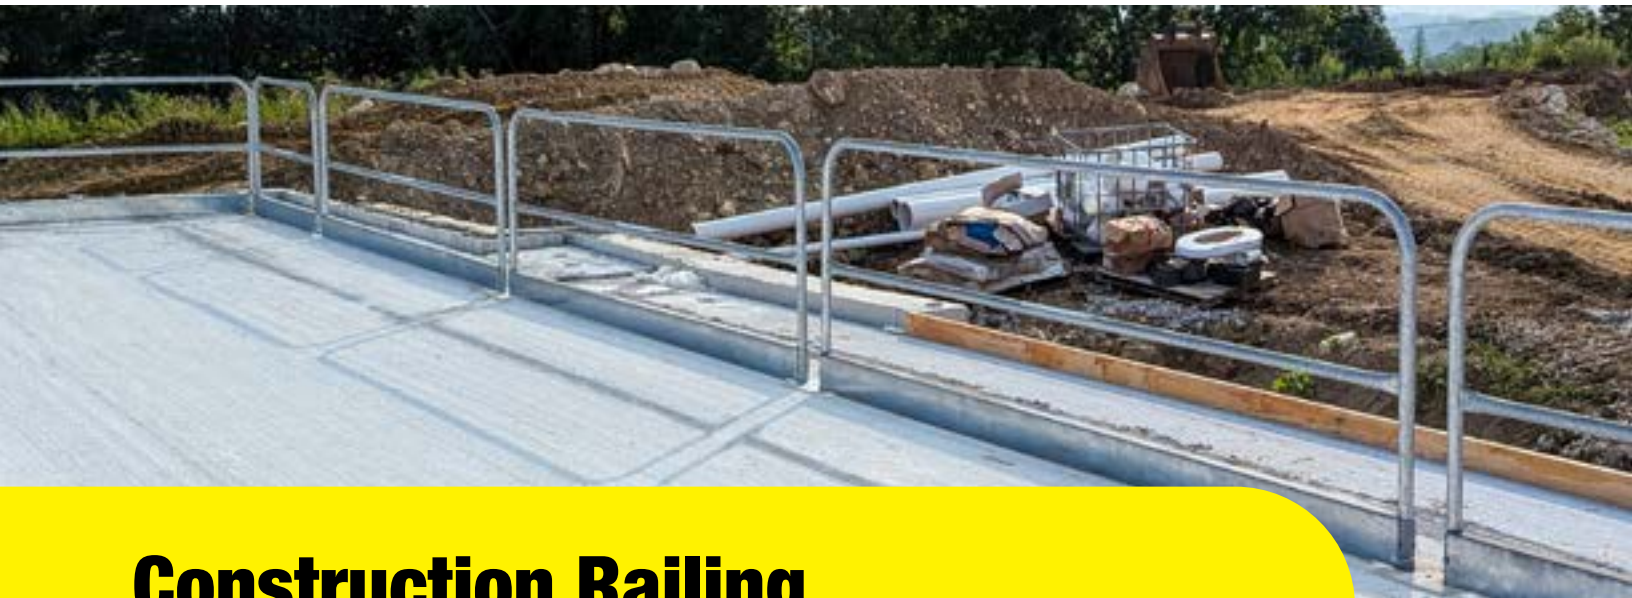

Visual Warning Lines

- ⊗ Designed in accordance with OSHA standards (29 CFR 1910.29 and 29 CFR 1926.502)
- ⊗ Weighted base plate allows wind resistance
- ⊗ 1/8" galvanized wire rope and aluminum pennants will last for years
- ⊗ System can integrate with fall protection railings

Forklift Barriers

- ⦿ Panel sizes 2'-10' in 1' increments
- ⦿ Withstands impacts up to 10,000 lbs at 5 mph
- ⦿ Anchors included for installation
- ⦿ Full-service layout & installation available

Construction Railing

- ⦿ Three railing length sizes: 10', 8' and 5'
- ⦿ Proprietary tri-holed base plate
- ⦿ Integrated toeboard
- ⦿ Construction Rail Cart available separately
- ⦿ Standard hot-dipped galvanized finish

When it comes to partners...we're The Safest.

End-to-end, inside and out, Safety Rail has you covered.

When you partner with Safety Rail Company, you can expect a full suite of services, and the industry's best products. Our manufacturing capabilities highlight our ability to fulfill not only standard products like any other supplier but also one-off, made-to-order items to complete your project. Mitigating risk is at the heart of everything we do... and that's no accident.

SAFETY RAIL CO.
THE SAFEST

ENGINEERED SOLUTIONS. DESIGNED. FABRICATED. INSTALLED.

We can produce up to 2 miles of guardrail a day... but that doesn't define us. It's true, nobody manufactures and installs more fall protection guardrail on the North American continent than Safety Rail Company. In addition, we assess, custom engineer, manufacture and install one-of-a-kind solutions.

So, tell us what you need, and we'll make it.
